

HOME & GARDEN

from the nature - back to the nature

Welcome to our Home and Garden range, where creative thinking is inspired, innovative processes are constantly explored, and sustainability is a lifestyle.

We pride ourselves in offering a wide range of quality Home and Garden solutions for beginners and avid gardening enthusiasts.

Explore our range of products produced especially for you.

Empowering people • Protecting environment • Creating value

TOTEM POLES

These poles are made with coir fibre sheets and used to guide creepers. They provide good structure and support for tendrils.

The media is also ideal for supporting sub-roots in vined plants. Coir sheets help retain moisture and have an all-natural look which makes it aesthetically pleasing.

Totem poles can be used for both indoor and outdoor purposes where tendrils or vines need to be supported.

PRODUCT USAGE

1.

2.

WEED MATS

Ideal to suppress the growth of unwanted vegetation or weeds around your plant's rooting system.

The weed mat allows plants to absorb essential nutrients without having to compete with weeds. It is economical as it reduces the use of weedicides and labour spent on weeding. Weed mats secure the moisture around the roots and control soil erosion around the plants.

Weed mats can be used in pots, plant beds or directly on the ground surrounding plants.

PRODUCT USAGE

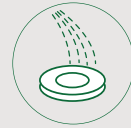

PLUGS

These come in the form of individual discs which are assembled in a tray for easy use and transportation. Each individual weed plug provides a microcosm for a seedling to grow, by allowing the absorption of essential nutrients and reducing the unwanted invasion of weeds.

Weed plugs are ideal for use in nurseries.

PRODUCT USAGE

COIR POTS

This product is 100 % biodegradable making it a top choice as an environmentally friendly solution.

Coir Pots can be used along with Coco Discs as a ready-made potting media for seedlings in nurseries. As the pot is biodegradable, seedlings can be transplanted into the soil along with the pot itself. This ensures that the plant does not suffer a transplanting shock. The porous walls of the pot allow optimum air circulation and rooting.

These can be custom made to fit in different pot sizes as required, making them compatible with different crops.

This is a highly sought-after product by the Gerbera, Orchid, Anthurium and other pot plant growers.

PRODUCT USAGE

4.

BLOCKS IN HANDLE-CUT BAGS

The blocks come in handle-cut bags and can be carried easily. The dry block can be removed from the packaging, placed in a large container and hydrated with water. Each bale will provide between 12-15 ltr/Kg (cbm/MT) depending on the type of the material.

Blocks can be customised with personalised branding, on request. This material is one of the most economical growing media, in terms of containerised transportation as the dry and compressed content comparatively uses less space space.

These blocks could be loosened/reconstituted to formulate material for pot filling.

PRODUCT USAGE

5.

DISKS

This is one of the most sought-after products by the Gerbera, Orchid, Anthurium and other pot plant growers.

The disk can be placed in a pot and hydrated for convenient use, saving time and labour involved in pot filling. Disks could also be custom manufactured to fit different pot sizes and can be produced in different air/water ratios, and particle structures making them tailor-made for different crops.

Can be placed inside any pot and used for Gerberas, Orchids, Anthuriums and other pot plants.

PRODUCT USAGE

7. HOME PACKS

FULL RANGE (1L/5L/10L/20L)

This is one of the most innovative products in home gardening. The pre-fertilised compact coco potting soil pack expands and transforms into a ready-to-use container by just adding water.

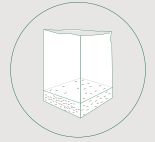

All that is required are a few incisions at the bottom for excess water drainage.

The potting soil contains a carefully selected blend of starter nutrients that nurtures your plants over several weeks. Home packs can also be used as a potting mix to replenish planter pots and flower beds.

This product is highly suitable for e-commerce due to its compactness and lightweight.

Can be used as a container itself or loosened to form pot filling.

PRODUCT USAGE

ROSES/ORCHIDS

Home packs for roses and orchids have the same features as the “full-range home packs” but with a speciality of crop-specific particle structures.

Can be used as a container or loosened to form pot filling.

PRODUCT USAGE

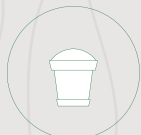

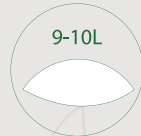

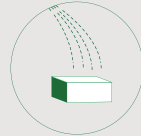

BRIQUETTES

Briquettes are compressed coir made into mini blocks. When hydrated fully with water, one briquette provides 9-10L of hydrated coir.

Can be reconstituted and used for pot filling.

PRODUCT USAGE

8.

COIR FIBER LOGS

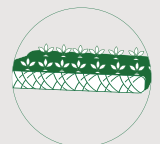

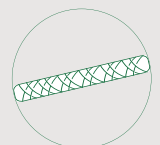

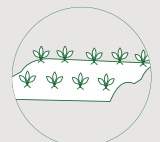

9.

Coir Logs are often used within water courses to provide immediate erosion protection to vulnerable river or canal banks that are suffering erosion and undermining.

They are often used in situations where remedial work has been carried out and vegetation has been lost on the river banks due to various natural and human causes. Without protection and assistance to revegetate, the exposed, vulnerable soil can easily be washed away.

Coir Logs are installed at the water-line where they prevent the wave action from damaging river or lake banks and provide support for vegetation.

PRODUCT USAGE

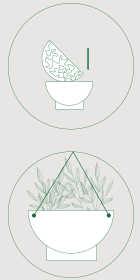

BASKET LINERS

The all-natural basket liners are made of coir fibre and are an ideal solution for your hanging pots. Its inner liner helps retain water and moisture, keeping roots from becoming dry.

Basket liners can be used as a container on their own or used as an inner liner to fill in a hanging pot/basket.

PRODUCT USAGE

10.

HUSK POT

These natural coconut husk pots are aesthetically pleasing. They are completely natural and can be used for both indoor and outdoor gardens.

Coconut husks contain a natural sponge-like structure that helps to hold water. As this is a natural product there may be some slight variation in size and shape.

Can be used with a range of indoor and outdoor plants.

PRODUCT USAGE

11.

TEG

BOX POT

Box pots are easy to assemble, and the exterior of the pot can be customised. The detachable panels provide efficient packaging, transport and storage capabilities.

Box pots are reusable and economical for eCommerce.

box pots can be used for a variety of plants simply by assembling the container, placing the filling and planting.

PRODUCT USAGE

13.

PET LITTER COARSE / FINE

Coco pet litter range creates the most comfortable environment for your pet. They are 100% natural, biodegradable, odourless, and environmentally friendly.

An ideal product for all domestic pets, including reptiles, rabbits, squirrels, hamsters, frogs, spiders, cats, etc.

This product can be spread into the lawn or used in enclosures as required.
